-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to converting image data from a first white point of a display to a second white point, classified in class 345, subclass 590.
- II. Claims 7-11, drawn to calculating the chromaticity triangle of an input image data, classified in class 345, subclass 639.

Inventions I and II are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed, because subcombination II requires certain features, such as "calculating the chromaticity triangle of a converted image data" that is distinct from what is required to perform the function of group I. The subcombination (group II) has separate utility in that its features are technically used for using a weighting value to convey a first image to a second image-a feature that is not required to perform the function of group I.

And, because of the distinct classifications between the groups and the reasons given above, restriction for examination purposes as indicated is Proper.

Art Unit: 2628

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1. 143).

Applicant is reminded that upon the cancellation of claims to a non-selected invention, the inventorship must be amended in compliance with 37 C.F.R. j 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. j 1.48(b) and by the fee required under 37 C.F.R. j 1.17(h).
